Project 1 Draft

Team 2
Names: Ian Boyer, David Carr, Samuel Costa, Maximus Latkovski, and Jy'el Mason

Criteria	Maximum	Score
Introduction	10	8.0
Overall Description	10	8.0
Interfaces	10	8.0
Functional Requirements	40	38.0
Non-functional Requirements	20	17.0
Spelling, grammar, style, and formatting	10	8.0
Total	100	87.0

Comments:

Good job!

Your introduction isn't bad, but some of your definitions are confusing. Some aspects of the game are left out.

Your overall description should include an outline of a game of Scrabble. Please specify the characteristics of users who can play your game.

Your interfaces section isn't bad, but it doesn't mention Java or much about the visual or audio hardware needed to play. Likewise, you are missing some UI diagrams, and the ones you have aren't labeled.

Your functional requirements are quite good. However, they should be numbered for requirements traceability. Also, an example of a complicated play, involving multiple words and score modifiers would be helpful.

Many of your descriptions of non-functional requirements are vague and untestable.

Your spelling is largely good, but there are problems with missing punctuation. While you have numbered headings for some sections, it would be better if you had numbering for all subsections. In particular, numbering your functional requirements would be useful.
